*Note.*

Lorsque les tableaux du Bulletin comportent une présentation territoriale résultant d'événements récents, il doit etre entendu que cette présentation ne vise qu'à fournir une base géographique aux séries statistiques qui l'accompagnent. Elle ne préjuge aucunement le caractère des modifications territoriales dont il s'agit.

Les divers signes utilisés out la signification suivante:

" — " = chiffre nul ou négligeable.
" . " = chiffre non encore publié ou inexistant.
" * " = chiffre provisoire ou estimation.
66.6 = les chiffres décimaux sont précédés d'un point.

L'expression "depuis" ou "jusqu'à" une certaine date doit s'entendre depuis ou jusqu'à cette date inclusivement.

In cases where the tables embody a territorial presentation resulting from recent events, it must be understood that such form of presentation is adopted solely for the purpose of providing a geographical basis for the accompanying statistical series. It does not in any sense prejudge the character of the territorial changes in question.

The various signs used have the following meanings:

" — " = figures are nil or negligible.
" . " = figures are not yet published or are not available.
" * " = figures are provisional or estimated.
66.6 = decimal figures are preceded by a full stop.

The expression "since" or "until" a given date is to be interpreted as inclusive of that date.

## INTRODUCTION

Aux pages 118-120 figurent des graphiques sur les **Billets en circulation et dépôts dans les banques commerciales** dans 30 pays depuis juillet, 1939.

Les modifications suivantes ont été effectuées:

**Tableau 1—Nombres-indices de la production industrielle.** Ajouté pour le *Chili* un indice spécial pour les textiles.

**Tableau 2—Production de certaines matières premières.** Les données afférant à la production de **houille** dans le *Royaume-Uni* sont de nouveau inclues.

**Tableau 6—Prix de Gros.** Ajouté le nouvel indice pour la ville de *Mexique* calculé par le Secrétariat de l'Economie Nationale: couvre 32 articles de consommation courante et 18 matières premières; se calcule selon la formule Marshall-Edgeworth: $I = \frac{\Sigma Pn\ (Qo + Qn)}{\Sigma Po\ (Qo + Qn)}$ où Po est le prix et Qo la consommation nationale apparente dans la période de base, et Pn le prix et Qn la consommation nationale apparente dans celle à laquelle l'indice se réfère. Les chiffres moyens mensuels de 1929 ont été pris comme base. L'indice pour l'*Espagne* a été révisé à la suite de changements secondaires dans sa composition.

**Tableau 10—Taux de l'argent hors banque.** Rétabli la série du *Japon*.

**Tableau 12.—Nombres-indices des cours des actions.** Pour la *France*, un nouvel indice officiel basé sur 1938 remplace l'ancien indice non pondéré, basé sur 1913, couvre également 300 actions et se calcule selon des moyennes arithmétiques pondérées déterminées d'après la valeur en bourse du capital-actions.

**Tableau 16—Dépôts de Caisses d'épargne.** Comprennent de nouveau pour la *France*, les dépôts des caisses d'épargne ordinaires. La série relative aux dépôts des caisses postales d'épargne au *Pays-Bas* comprend maintenant les intérêts ajoutés en avril 1940 à 1942 (17,15 et 12 millions).

**Tableau 17—Recettes et dépenses budgétaires.** Les pages 87-90 du *Bulletin* No.4 (A), 1943 contiennent les données rétrospectives de ce tableau.

Une prochaine édition du *Bulletin* contiendra des chiffres rétrospectifs pour les séries nouvelles ou révisées mentionnées ci-dessus.

Mai, 1943.

Graphs showing the monthly movement of **Note Circulation and Commercial Bank Deposits** in 30 countries since July 1939 are given on pages 118-120.

The following changes have been made:

**Table 1—Index numbers of Industrial Production.** *Chile*: A special index for textiles has been added.

**Table 2—Production of Certain Raw Materials.** Data relating to **coal** production in the *United Kingdom* are again included.

**Table 6—Wholesale Prices.** The new index for *Mexico City* computed by the Secretaria de Economia Nacional is now given. It covers 32 articles of current consumption and 18 raw materials, and is calculated according to the Marshall-Edgeworth formula: $I = \frac{\Sigma Pn\ (Qo + Qn)}{\Sigma Po\ (Qo + Qn)}$ where Po is the price and Qo the apparent national consumption in the base period, and Pn the price and Qn the apparent national consumption in the period for which the index is calculated. The original base was the monthly average of 1929. The index for *Spain* has been revised as a result of minor changes in its composition.

**Table 10—Money Market Rates.** Series for *Japan* re-introduced.

**Table 12—Index Numbers of Share Prices.** A new official index for *France* based on 1938 replaces unweighted index based on 1913. It covers the same number of shares (300) and is computed by means of weighted arithmetic averages, the weighting coefficients being determined by the Stock Exchange value of the shares issued.

**Table 16—Savings Bank Deposits.** Deposits in ordinary savings banks are again given for *France*. Series for Post Office Savings Bank deposits in the *Netherlands* now includes interest added in April 1940-1942 (17, 15 and 12 millions).

**Table 17—Budget Receipts and Expenditure.** Retrospective figures for this new table will be found on pages 87-90 of *Bulletin* No. 4 (A), 1943.

Retrospective figures for above new or revised series will be given in a future issue of the *Bulletin*.

*Note. — Partie a)*: Moyennes des cours d'achat à New York pour les transferts télégraphiques, excepté les séries indiquées ■ qui sont basées sur les cours dans le pays. — *Partie b)*: moyennes des cours d'achat et de vente à Londres (valeur de £ en unités de la monnaie indiquée). *Partie c)*: Prix de l'or par once de fin (= 31.1035 grammes).

La plupart des monnaies de pays européens et de l'Extrême Orient ont cessé d'être cotées à New York au cours des trois dernières années. La valeur moyenne de ces monnaies en cents des Etats-Unis est indiquée ci-dessous pour cette partie de la période en considération pour laquelle les cours sont disponsibles:

*Note. — Part a)*: Averages of buying rates in New York for cable transfers, except series marked ■ which are based on domestic quotations in individual countries. — *Part b)*: Averages of buying and selling rates in London (equivalent of £1 in currency unit shown.) — *Part c)*: Price of gold per fine ounce (1 fine ounce = 31.1035 grammes).

Most European and Far Eastern currencies ceased to be quoted in New York in the course of the last three years. Average value of these currencies in U.S. cents is given in the statement below for that part of the period under consideration for which quotations were available:

*Chiffre provisoire.

Note.—*Sauf indication contraire, les réserves données sont celles publiées périodiquement par les banques centrales. La valeur de l'or est exprimée en règle générale, à la parité légale la plus récente, même si elle n'est plus effective. Dans le cas de pays qui ont modifié le contenu-or légal de leurs monnaies au cours de la période prise en considération, les réserves sont exprimées pour cette période tout entière à la parité la plus récente. Pour les changements de parités voir l'Annuaire Statistique de la Société des Nations 1940/41, Tableau 96; depuis la publication de la dernière édition de l'Annuaire, un nouveau contenu-or légal a été fixé en Hongrie (IX.1941: 0.21749 g.d'or fin) et au Salvador (VI.1942: 0.35547).*

*Les avoirs étrangers sont, en règle générale, évalués au prix coûtant en monnaie nationale (papier). Dans le cas de certains pays d'Europe continentale, les séries marquées ■ représentent presque exclusivement les avoirs en Reichsmarks.*

*Provisional figure.

Note.—*Unless otherwise stated, the reserves here shown are those periodically reported by Central Banks. Gold is expressed, as a rule, in terms of the most recent legal parity, whether effective or in fact suspended. In the case of the countries which have changed the legal gold content of their currency during the period covered by the table, the reserves are expressed for the whole period under review in terms of the most recent parity. For changes in parities, see the Statistical Year-Book of the League of Nations, 1940/41, Table 96; since the publication of the last edition of the Year-Book, new legal gold content was fixed in Hungary (IX.1941: 0.21749 g. of fine gold) and in Salvador (VI.1942: 0.35547).*

*Foreign assets are, as a rule, valued at their purchase price in national (paper) currency. In the case of some Continental European countries, the series marked ■ consist almost wholly of Reichsmark balances.*

Note.—*La distinction entre la dette intérieure et extérieure et entre la dette consolidée et flottante est établie, en règle générale, d'après la classification des relevés officiels. En l'absence de classification officielle d'après l'échéance, les dettes à échéance de moins de deux ans ont été considérées comme dettes flottantes. La dette intérieure figure soit au pair (séries marquées ■) soit au cours du change à la date donnée (séries marquées □).*

**Provisional or approximate figure.*

Note.—*The distinction between internal and external debt and between consolidated and floating debt is based, as a rule, on the classification of the official statements. In the absence of official classification according to maturity, debts falling due within a period of less than two years have been regarded as floating debt. External debt is shown either at par (series marked ■) or at the rate of exchange obtaining on the dates given (series marked □).*

Note générale aux tableaux 19 et 20 — *Une grande partie des chiffres est fournie par le* Bureau International du Travail. — *Le but et la nature des données sur l'emploi et le chômage, ainsi que les diverses industries considérées, varient selon les pays et ne permettent pas une comparaison exacte des indices de l'emploi, du nombre des chômeurs ou des pourcentages du chômage. Pour de plus amples renseignements sur les séries publiées, voir* Annuaire des Statistiques du Travail 1942.

General Note to Tables 19 and 20. — *Many of the figures are supplied by the* International Labour Office. — *The scope and nature of the employment and unemployment returns and the trades included vary from country to country and render impossible accurate comparison of the employment indices, the numbers of unemployed and unemployment percentage. For further details concerning the different series, see* Year Book of Labour Statistics 1942.

### THE TRANSITION FROM WAR TO PEACE ECONOMY

Report of the Delegation on Economic Depressions, Part I

This report is an attempt to map out the methods and measures, both domestic and international, by which a smooth transition from war to peace economy and the maintenance of production and employment after the war may be facilitated.

(Series of League of Nations Publications. 1943.II.A.3)

118 pages ..... paper bound 4/6 $1.00
cloth bound 6/- $1.50

### COMMERCIAL POLICY IN THE INTERWAR PERIOD: INTERNATIONAL PROPOSALS AND NATIONAL POLICIES

The first part of this study compares the commercial policies pursued in the interwar period with the recommendations made or the action agreed upon by conferences and other international bodies; the second part contains an analysis of the reasons for the frequent and striking discrepancy between proposals and policy, and, in general, for the success or failure of specific recommendations made regarding tariffs, quotas, exchange control, M.F.N. preferential customs *régimes* and other aspects of commercial relationships.

(Series of League of Nations Publications. 1942.II.A.6)

165 pages ..... paper bound 7/6 $1.75

### ECONOMIC FLUCTUATIONS IN THE UNITED STATES AND THE UNITED KINGDOM, 1918-1922

A study of the process of adjustment to a peace economy after the first world war. Analyses, with abundant statistical references, the course of production, employment and prices during the first short recession after the Armistice, the boom from the middle of 1919 to the middle of 1920, and the subsequent depression. The economic policies adopted by the United States and the United Kingdom are considered with a view to assisting in the formulation of policy to mitigate the risk of depression after the present war.

(Series of League of Nations Publications. 1942.II.A.7)

96 pages ..... paper bound 6/- $1.50

### THE NETWORK OF WORLD TRADE

The purpose of this volume is to analyse trade from a universal point of view, as it existed before the outbreak of the present war. It deals with the relative importance of the trade of the various trading areas; the nature of the goods entering into trade; the dependence of the areas upon one another as buying and selling markets; and the network of trade channels that connect the groups and form a worldwide vascular system. Finally the world system of multilateral trade is examined in the light of figures of trade balances calculated for this purpose.

## WARTIME RATIONING AND CONSUMPTION

This is the first comprehensive study that has appeared on rationing and consumption in the present war. It opens with a general discussion of consumption control in war economy, the various methods adopted, and the connection between rationing and price control. The main emphasis is naturally placed on food rationing and its effect on nutrition. An account is given of food rations in some 30 countries and the nutritive value of rations is compared with normal requirements and peacetime consumption. One chapter discusses the rationing of other goods, such as clothing and household articles, and a brief consideration of the aggregate volume of consumption in various countries concludes the study.

## RELIEF DELIVERIES AND RELIEF LOANS, 1919-1923

This study on relief after the last war is one of a series that the League of Nations is bringing out devoted to the lessons that may be learnt from past experience and that may prove of value when policies for the postwar world are being formulated. It deals with the organization of government relief activities after the last war; the work done by charitable organizations; the cost of communal feeding; the composition of the meals provided to the undernourished children of Europe; the connection between relief and social and financial stability; the fate of relief loans; the effect of relief deliveries on the price and stock situation in the United States, etc. It also contains a series of conclusions based on the evidence afforded by this piece of history.
